We have created a “Helper SQL for CRA ARPA earnings code W2 box14 clean up.SQL”. It helps clean up the current existing CRA/ARPA earnings code filling with the correct W2 fields. This script is available on the SFTP site; please download and run this script on your database to fix all company earning setups. If you are a hosted licensee, please reach out to team1@mpay.com for assistance.

Important: The final W2 box 14 for ARPA update will be in the next product release, please do not calculate W2 with ARPA related earning codes until after you download and install the next release, but do not forget to run the SQL in the database before calculating W2.
