

# Payentry Time Management Version 1.49

---

The current release includes the following changes:

## Development Tags

- Added New Ability to Show Employee-Specific Job Codes

### Development Tags

#### **Added New Ability to Show Employee-Specific Job Codes (TM-8)**

This feature allows an employer to configure which jobs an employee has access to when punching in & out through the Time Management web application.

In order to utilize this functionality, the first step would be to assign jobs to an individual employee in NextGen on their Employee Profile. The jobs assigned here will be the jobs available to the employee in Time Management. This data will then sync to Time Management during the next scheduled sync or during the next manually requested sync.

In Time Management, there is a new parameter on the Timecard Rule called 'Limit Job Codes.' The default is false, which means all jobs will be shown to every employee (this is the existing behavior). In order to display only the jobs assigned to an employee (as defined in their NextGen profile), you will want to enable this parameter.

Please note that this functionality will be added to the My Payentry mobile application in a future release.
